

# The Bakul Washing Machine Booking

## Aim :

Ever stood for a long time to get your clothes washed or went at odd times in the hope of getting free washing machine. We have got the perfect product for you. This web application gives the real time status of the washing machines. This allows you to reserve a slot in order to avoid the situation of a number of people reaching the machine at the same time. When you register for a free machine, you are given a 50 minute window to start and use your machine.

## Tech Stack Used :

A bootstrap template is used to create the frontend and then edited using basic HTML, CSS and JS knowledge. Python extension flask is used to dynamically generate the Website. Data is then stored in SQLite Database using SQLAlchemy.
